# **PRIORITY DOCUMENT**

SUBMITTED OR TRANSMITTED IN  
COMPLIANCE WITH RULE 17.1(a) OR (b)

I, the undersigned, being an officer duly authorised in accordance with Section 74(1) and (4) of the Deregulation & Contracting Out Act 1994, to sign and issue certificates on behalf of the Comptroller-General, hereby certify that annexed hereto is a true copy of the documents as originally filed in connection with the patent application identified therein.

I also certify that the application is now proceeding in the name as identified herein.

In accordance with the Patents (Companies Re-registration) Rules 1982, if a company named in this certificate and any accompanying documents has re-registered under the Companies Act 1980 with the same name as that with which it was registered immediately before re-registration save for the substitution as, or inclusion as, the last part of the name of the words "public limited company" or their equivalents in Welsh, references to the name of the company in this certificate and any accompanying documents shall be treated as references to the name with which it is so re-registered.

In accordance with the rules, the words "public limited company" may be replaced by p.l.c., plc, P.L.C. or PLC.

Re-registration under the Companies Act does not constitute a new legal entity but merely subjects the company to certain additional company law rules.

## Automatic behaviour modifications in Symbian OS

The Symbian OS running on a smartphone or other kind of wireless device is aware of various piece of information relating to the status of the device, its location, the status of its user etc.

The OS can automatically use this information to perform a range of actions to alter device behaviour. The following table summarises these possibilities.

OS HAS KNOWLEDGE OF	HOW DOES IT HAVE THIS KNOWLEDGE?	CAN USE THIS KNOWLEDGE TO MODIFY BEHAVIOUR
If in a "silent appointment" (a type of meeting)	In Agenda, user can label entries (Day-Event etc) as silent	By automatically altering Profiles/ring tones (e.g. silent mode if agenda indicates user in a meeting)
On a plane	Create a flight entry in agenda	By automatically switching off the device; or just switching off the phone capability (radio) and using the device as a PDA.
Sleep settings	User defined period when not to be disturbed/ woken up	By automatically altering Profiles/Ring tones (e.g. silent mode if agenda indicates user in a meeting)  By automatically altering entering a power saving mode
Location (using some kind of location awareness)	GPS	By automatically altering Profiles/ring tones (e.g. silent/vibrate mode if agenda indicates user in a meeting room or a public library or some other quiet area)  By automatically altering power (auto-switch off of phone capabilities if in an aeroplane, hospital etc)  By automatically altering device's UI styling (ring tones, colour scheme, images) whether at work or not.  By automatically preventing an in-built camera to be switched on or used in restricted areas (security clearance areas in airports being one of them)
Work/office hours	User defines usual working hours/days	By automatically altering device's UI styling (ring tones, colour scheme, images) if at work; altering again when in leisure time.
Travel time	User defines usual travel times	By automatically altering Profiles/ring tones (e.g. automatically activating a divert to voice mail profile).
Other regular predictable times	User defines	By automatically altering Profiles/ring tones

that deserves a specific behaviour		
<b>Security/Privacy</b>	By activation of secure components (e.g. software or hardware that is only activated when the user is engaged in an activity that needs to be secure – e.g. entering a password to access an m-commerce web site; entering a credit card number)	By automatically altering Profiles/ring tones (e.g. automatically activating a divert to voice mail profile after a user defined number of unanswered rings since one would not want to be disturbed when entering a secure transaction).  By automatically altering device's UI styling to act as a visual confirmation that the device is in secure mode.
<b>User identity</b>	business V-card	By automatically altering device UI styling (ring tones, colour scheme, and background images) to, for example, business or fun styling
<b>User mood</b>	Presence information (e.g. selected/entered by user)	By automatically altering ring-tones, colour scheme, background pictures
<b>Nearby groups</b>	Presence information of group members;	
<b>Environment</b>	phone-radio, bluetooth, airport, room	
<b>Nearby devices</b>		
<b>Nearby people</b>	bluetooth and existing contacts database	Automatically notify user that people in contacts database are close by
<b>Nearby friends</b>		Automatically notify user that friend is in range
<b>People with similar interests (hobbies, romantic?) or values</b>	all devices transmit "I'm interested in..." message to all bluetooth devices that come into range	Automatically notify user of nearby person with similar interests to oneself
<b>Anniversaries</b>	already in Agenda	Automatically notify the user of anniversary, a user selectable time period in advance
<b>Meetings and Courses</b>	specific type of enter in Agenda	remind user to review notes/actions from previous meetings/training courses

		attended
	have user definable or user selectable behaviours in Agenda (power save, power off, profile, UI styling)	
time/dated to- dos	already in Agenda	notify user to-do is about to expire
what bluetooth devices are in range	bluetooth radio system	save battery power by turning off bluetooth radio in bluetooth rich environment

**BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- ☐ BLACK BORDERS
- ☐ IMAGE CUT OFF AT TOP, BOTTOM OR SIDES
- ☒ FADED TEXT OR DRAWING
- ☒ BLURRED OR ILLEGIBLE TEXT OR DRAWING
- ☐ SKEWED/SLANTED IMAGES
- ☐ COLOR OR BLACK AND WHITE PHOTOGRAPHS
- ☒ GRAY SCALE DOCUMENTS
- ☒ LINES OR MARKS ON ORIGINAL DOCUMENT
- ☐ REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY
- ☐ OTHER: \_\_\_\_\_

**IMAGES ARE BEST AVAILABLE COPY.**

**As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.**
